

**HAMMAN AG RESEARCH**

Pesticide Applicator Training & Recertification

*Present Training for*  
**\*\*ALBERTA FARMER PESTICIDE  
APPLICATOR CERTIFICATE \*\***

Lethbridge, AB at the Hamman AG Research Farm  
Wednesday, March 15<sup>th</sup> or Wednesday, April 5<sup>th</sup>, 2017

**TUTORIAL and EXAM OR: RECERTIFICATION for  
ALBERTA FARMER PESTICIDE APPLICATOR CERTIFICATE**

**The Certificate Course** is a 1 day course. Study manuals are provided in addition to instruction with lectures and Power Point presentation on the 7 modules plus the grain storage module. A proctored 2 hour 70 question exam is provided at end of day OR: or can be completed the next morning through arrangements with Gary Secrist of the Lethbridge County. The pest management regulatory rules are getting more stringent and are requiring that a number of pesticides can only be purchased and used by certified applicators. Companies, Manufacturers and grower organizations such as the Potato Growers Association are requiring certification in order to obtain certain pesticides and grow commodities under their contracts. We foresee that this will only continue to become more problematic for those without certificates. We will also provide training for the Grain bin Storage with Phostoxin. If you already have your certificate and it is about to Expire after 5 years.. then this course will provide you recertification credentials (no EXAM) for another 5 years.

**The Certificate will be sent to you by Alberta Agriculture after successfully passing a closed book exam at end of day. Generally all applicants pass the exam as the course stresses key exam concepts. Alberta Environment requires that the materials taught in the course be taught by an authorized trainer. Dr. Bill Hamman is a certified trainer who has been teaching pesticide application legislation, applicator and environmental safety for over 25 years..**

**INSTRUCTOR:**

**Dr. Bill Hamman, President Hamman AG Research and Senior Agri-Coach® with AgriTrend Agrology**

Dr. Bill has instructed the pest application for Provincial certifications for over 25 years and is considered a top lecturer on the subject material. He is President of Hamman AG Research, a company that is well respected in the Agriculture Research Business. He instructs the Agriculture, Landscape, Seed Treating and Industrial certificates with a very successful pass rate for students taking the exam. The instruction is energetic and fact filled and you will enjoy this course.
