

WHAT: A storm water plan for the Battersea Drain

WHERE: Battersea Drain

WHY: The Battersea Drain has experienced flooding in the past. Contributing factors include flat topography, the existence of canals within natural drains, and the closure of LNID canals that have previously conveyed storm water.

WORK COMPLETED TO DATE

The Request for Proposal was issued September 26 and closes October 17.

BENEFIT TO RESIDENTS

The storm water plan will help administration to understand the drainage network and provide the information required to make decisions regarding improvements to the drainage system. This will also greatly assist in making decisions on whether to take over abandoned canals or not.

Total project costs: \$75,000
Funded through a federal grant
(Federal Gas Tax Fund)

**Scheduled
completion date:
December 2018**
