

**WHAT:** Scheduled 3 year replacement of orthographic photos

**WHERE:** Lethbridge County

**WHY:** Digital aerial imagery (orthographics) is the most fundamental dataset for use with GIS, assessment, planning, and municipal services. Orthographics serve a variety of purposes, from general planning, to field reference for analysis, to a tool for data development and revision of maps.

## WORK COMPLETED TO DATE

Aerial photography is complete, with images expected back from the contractor in December.

## BENEFIT TO RESIDENTS

Orthographics benefits include: saving time in locating and responding to emergencies and informing public decisions, and avoiding the cost of erroneous information due to out-of-date imagery.

**Total project costs: \$60,000**

Funded through reserves  
(\$20,000 is added annually to reserves)

**Scheduled  
completion date:  
August 2018**
