

WHAT: Includes the expansion of the Birds of Prey Centre in Coaldale to increase storm water storage capacities. A dry pond and deep basin pond will be constructed to capture storm water and direct it to the Birds of Prey Centre. An additional 300,000m² will exist after construction is complete.

WHERE: Lethbridge County and the Town of Coaldale

WHY: Providing this infrastructure will benefit residents of Lethbridge County and the Town of Coaldale.

WORK COMPLETED TO DATE

The north wetland complex is substantially complete. The south dry pond to be complete in October. The South interceptor channel is complete. Planting will be completed in the spring of 2019.

BENEFIT TO RESIDENTS

Providing additional conveyance capacity of storm water in the Malloy Drain will reduce the risk of damage to infrastructure in the future.

Total project costs: \$5.4 million

Funded through provincial grants (Municipal Sustainability Initiative & Alberta Community Resilience Program), the Town of Coaldale, and St. Mary River Irrigation District.

**Scheduled
completion date:
Spring 2019**
